

Job and assignments

The shipyard painter does a prominent work. He/she is an expert in surface treatment and paint application, and contributes to protect hulls from corrosion. His/her aesthetic sense and the quality of his/her work bring added value to the ship, especially with touches up and finishing. He/she complies with safety rules when using paints and anti-corrosion treatments.

Work environment

The painter frequently works on scaffolding. He/she respects specific safety rules because of the use of many toxic products, and wears personal protective equipment.

Inter-personal and expert skills

- You know how to use the specific tools of the painter: spray gun, polishing machine, sander...
- You have a good knowledge of products handled (tolerances and incompatibilities, chemical contents...)
- You meet the requirements in terms of quality, safety and environment
- You have aesthetic sense
- You are methodical and meticulous
